RESEARCH EXPERIENCE:

2001 — present

Post Doctoral Fellow: X-Ray Scattering Studies of Liquid Metal Surfaces

Division of Engineering and Applied Sciences, Harvard University, Cambridge, MA

- Conducting experimental studies of free liquid metal surfaces of elemental metals (Sn, K), metal alloys (BiSn, AuSi, AuGe) and thin oxide films (SnO/Sn) by surface x-ray scattering techniques using synchrotron x-ray radiation at Brookhaven National Lab (NSLS, BNL, Brookhaven, NY) and Argonne National Lab (APS, ANL, Chicago , IL)
- X-ray reflectivity data analysis, modeling and fitting. Writing program codes for the surface x-ray reflectivity modeling in C/C++ and Origin C

1998 — 2001

Research Assistant/Post Graduate Student: High-resolution photoelectron spectroscopy and x-ray diffraction of surfaces of rare-earth metal single crystals. Crystal surface interaction with adsorbates

Freie Universitaet Berlin, Germany / St. Petersburg State University, Russia

- Conducted experiments on electronic and magnetic properties and morphology of surfaces of thin rare-earth metal single crystalline films (Ho, Gd, Eu and others). Extensive experience with the state-of-art photoelectron spectrometer Scienta-300.
- Developed software and mechanical set-up for the soft x-ray diffraction experimental station
- Conducted first magnetic soft x-ray diffraction experiments on thin lanthanide films

1996 — 1998

Research Assistant/Post Graduate Student: Electron-electron spectroscopies of rare-earth metal compounds

St. Petersburg State University, Russia

- Conducted experiments on growth, characterization and analysis of physical-chemical properties of rare-earth metal silicide compounds with electron spectroscopy and diffraction techniques

1993 — 1996

Research Assistant/Graduate Student: Scanning probe microscopy of surfaces of semiconductors and insulators

St. Petersburg State University, Russia

- Developed the laboratory version of atomic force microscope (AFM) and conducted experiments on morphology of BN and HOPG surfaces

EDUCATION

2001 **Ph.D. Physics**, St. Petersburg State University, Russia / Freie Universitaet Berlin, Germany
“Silicon interaction with surfaces of rare-earth metal single crystals”

1996 **M.S. Physics**, St. Petersburg State University, Russia

1994 **B.S. Physics**, St. Petersburg State University, Russia

WORK SKILLS:

- ✓ Extensive experience with various experimental techniques of surface science and nanotechnology including: X-Ray Diffraction (XRD), Grazing Incident Diffraction (GID), Soft X-Ray Diffraction, Anomalous X-Ray Diffraction, High Resolution Ultraviolet Photoelectron Spectroscopy (UPS) (experience with high-end photoelectron spectrometers including Scienta analyzers), X-Ray Photoelectron Spectroscopy (XPS), Auger-Electron Spectroscopy (AES), Electron Energy Loss Spectroscopy (EELS), Low Energy Electron Diffraction (LEED), Atomic Force Microscope (AFM), Scanning Tunneling Microscope (STM), Some experience with Scanning Electron Microscope (SEM)
 - ✓ Excellent experimental skills in Ultra High Vacuum (UHV) technology, both solid and liquid sample preparation, thin film growth, MBE and CVD.
 - ✓ Experience of work at various synchrotron radiation facilities including BESSY (Germany), HASYLAB (Germany), ESRF (France), NSLS (NY, US), APS (IL, US)
 - ✓ Programming experience with C/C++ and Fortran environments. Familiarity with Origin scientific software, programming in Origin C.
